# 100M vanadium energy storage power station

## Overview

---

On October 30, the world's largest and most powerful 100-megawatt liquid flow battery energy storage peak-shaving power station, which was technically supported by the team of Li Xianfeng, a researcher from the Energy Storage Technology Research Department of Dalian Institute of Chemical Physics (DNL17), was officially connected to the grid for power generation. Is vanadium the future of battery energy storage?

The use of vanadium in the battery energy storage sector is expected to experience disruptive growth this decade on the back of unprecedented vanadium redox flow battery (VRFB) deployments.

Can vanadium be used as an energy storage unit?

Vanadium is an abundant silvery-gray metal, primarily mined in China, Russia, South Africa and Brazil, that is used as an energy storage unit. Part one of our three-part vanadium series focuses on the invention, applications, and uses of vanadium in this capacity.

Where is Dalian flow battery energy storage peak-shaving power station located?

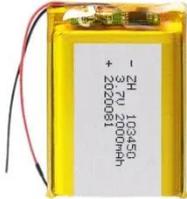

The 100 MW Dalian Flow Battery Energy Storage Peak-shaving Power Station, with the largest power and capacity in the world, has finished its system joint debugging in Dalian, China, and was put into operation in late October.

Can vanadium chemistries solve large-scale energy storage problems?

Vanadium-based cell chemistries hold the promise to resolve persistent problems associated with large-scale energy storage. Commented Troy Grant, CEO, "Elcora is devoted to unlocking the full potential of solar and wind through large-scale energy storage capacity."
