# 110v DC portable power bank

## Overview

---

How much power does a portable power bank use?

Rated power is 65W (Tips:AC output needs to be turned on or off manually. If DC output is only turned on and no electronics are connected, the portable power bank will be turned off within 20 seconds).

Can a portable laptop battery pack accept a DC 5521 AC outlet?

The portable laptop battery pack can accept DC5521 13V-16V, 2A max input, you only need to purchase a solar panel with DC 5521 port that the ac outlet battery pack can accept. Sa fait comme les power bank normal mais en beaucoup plus cher. Pour connecter radio ou autres sa fonctionne pas.

Can a buck-boost controller be used as a DC charger?

Our specially designed buck-boost controller features wide range input from 10V, meaning it can also be used as a DC charger when connected in-vehicle to the DC car socket. This can deliver up to 10A whilst on the move providing a nice 120W of trickle charging whilst in-vehicle.
