What is a 12 volt inverter used for?

These 12-volt units are generally used in cars or trucks, or smaller backup power systems, so they make an ideal option if you're looking for a portable inverter that you can take on the go. Due to their smaller size and power capabilities, they function well when added to vehicles without a direct power connection like buses or boats.

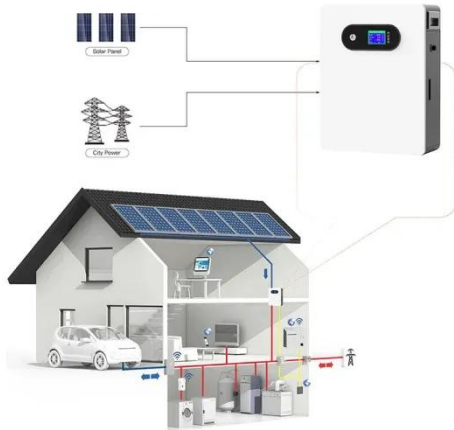

What is a DC 12V 380V inverter?

Our DC 12V-380V customizable solutions have earned the trust of over 20 major distributors across North America and Europe. Inverters are used in any application where a DC power source must be converted to an AC power source. The most common applications are in battery-powered RVs camping, Post disaster housing power supply, Yacht etc.

How much power does an inverter need?

It mainly depends on the total power of the device you want to use with the help of the inverter. If a 1450W coffee machine is connected, the minimum power of the inverter must be 1500W. It is necessary to consider starting the peak, for example, the power of the refrigerator is 3-5 times higher than its rated power in order to operate.
