# 15 kW solar container battery

## Overview

---

How many kWh does a 15 kWh solar battery deliver?

Our 15 kWh solar battery delivers 15 kilo-watt hours (kWh) per cycle. To determine if this is suitable for your needs, check your power bills to find your average daily and peak daily kWh consumption. We offer solar battery packs ranging from 1 kWh to over 100 kWh.

What is the range of solar battery packs available?

We have solar battery packs available that provide power storage from 1kWh to more than 100 kWh. These solar batteries are rated to deliver 15 kilo-watt hours kWh per cycle. Check your power bills to find the actual kWh consumption for your home or business.

What keeps the solar batteries charged?

To keep the batteries charged, combine the battery storage with a PV solar panel system. Browse solar batteries rated to deliver 15 kilo-watt hours kWh per cycle.

How many kWh does a solar battery system use a day?

The average home uses 30 kWh per day. When sizing a grid-tied solar battery system for daily usage, you will want a system that can deliver up to 30 kWh, or possibly more for peak usage days.
