150-foot folding shipping container used on Libyan highways

Overview

What is a foldable container?

A foldable container is a specialized container unit made to transport sets or stacks of materials. It is made of thick and robust wire mesh and rollers that allow easy movement. The availability of a range of coloured wire meshes makes these shipping container units a little more cheerful. 11. Half-Height Containers.

What is a collapsible shipping container?

Shippers are demanding improved efficiencies and sustainability throughout their supply chains. COLLAPSECON is the collapsible shipping container pioneering the future of global trade. It's practical and rigid design saves on space, cost and handling, and helps to significantly reduce industry emissions.

How many containers can a collapsecon hold?

COLLAPSECON's innovative and fully automated design allows up to 4 containers to be collapsed and combined, giving them a fully laden weight and enabling them to be transported anywhere on a ship. 1/6 COLLAPSECON collapses horizontally, ensuring the container maintains its structural rigidity in any form.

What is a circular shipping container?

As the name suggests, circular shipping containers are made from steel, lightweight metals, fibre, hard plastic, etc., which are most suitable for bulk transport of liquid materials. They are smaller but may need extra space due to their shape. 15.
