16 battery cabinet ups two layers

Overview

How to choose UPS battery cabinets?

Furthermore, the cabinets need to offer removable hinged doors so that the UPS system can be easily accessed. Doors need to be locked for safety and security. UPS Battery Cabinets have to be designed to house most front terminal batteries. Your UPS Battery Cabinets should have removable side panels so that cables can be easily installed.

What size battery cabinet does Arimon offer?

Arimon offers several standard monobloc or top terminal battery cabinet sizes for 10 kVA to 125 kVA UPS systems accommodating monobloc batteries from 100 WPC (64 batteries) to 540 WPC (40 batteries) or can work with you on even larger custom battery cabinet solutions if needed.

What is a battery cabinet?

Battery cabinet that includes Lithium-ion batteries, Battery Management System (BMS), switchgear, power supply, and communication interface. Reduces the battery room size and increases tolerance to a wider operating temperature range, which allows you to decrease the capacity of the cooling solution.

What are Arimon battery cabinets made of?

All battery cabinets are constructed from heavy gauge steel with a durable welded frame and acid resistant powder coated finish available in a wide range of colors. Arimon UPS backup battery cabinets offer breaker or fuse protection up to 800 Amps.
