20-foot folding container for subway station use

Overview

What is a 20ft shipping container?

Explore why Boxhub's 20ft shipping containers are the ideal storage solution for compact spaces. 20ft containers are designed to carry small volumes of heavy cargo, such as machinery, cement and steel. These qualities make them ideal for the storage of large items—like farming and construction equipment—or for re-use as the frame of a modular home.

How do I choose a 20ft container?

Choose a 20ft used container. If you're looking for a box to transform into a container office, home, or pool, we recommend purchasing a new 20ft container. 20ft new containers, also known as “one-trips”, have been used once before being sold for non-shipping purposes.

Can a 20ft shipping container be used as a storage shed?

If you can name it, a 20ft shipping container can probably do it. 20ft shipping containers are a popular alternative to building a storage shed, given their compact design and weatherproof steel exterior. Some businesses have even transformed 20ft boxes into industrial batteries to support the storage of renewable energy.

Should I buy a used 20ft shipping container?

If you're looking for a budget-friendly container for static storage purposes, we recommend purchasing a used 20ft shipping container. Used 20ft containers have been retired by the world's shipping lines after around 15-20 years of use.
