Solar Battery**

Overview

How much do solar panels cost in New York?

As of 2024, the average cost of solar panels in New York is \$3.30 per watt, making a typical 6.9 kilowatt (kW) solar system \$16,632 after claiming the 30% federal solar tax credit now available. This is higher than the average price of residential solar power systems across the United States, which is currently \$3.00 per watt.

How much does a 5 kilowatt solar system cost in New York?

You'll pay an average of \$14,608 to install a 5 kilowatt solar panel system in New York, before incentives. The federal investment tax credit (ITC) lowers that price by 30% of all your solar equipment and installation costs. Why trust EnergySage?

As subject matter experts, we provide only objective information.

How much does a solar system cost?

This is higher than the average price of residential solar power systems across the United States, which is currently \$3.00 per watt. The size of a solar panel system also plays a role in how much the installation will cost. Larger solar installations typically have a lower cost per watt because the panels can be purchased at a 'bulk price.'

Can you get a \$0-down solar loan in New York?

Some companies even offer \$0-down loans so you can start saving on day one if your loan payments are less than your current electric bills. Just keep in mind that your long-term savings will be lower with a loan due to interest rates. What affects the cost of solar panels in New York?
