275 There are several prices for solar panels

Overview

How much does a solar panel cost?

From 2010 to 2020, solar panel prices dropped by nearly 90%, with costs per watt falling from approximately \$3.86 to \$0.38 globally (source: IRENA). This decline slowed in recent years but remained consistent. Between 2020 and 2025, residential solar system costs, averaging \$2.50 to \$3.50 per watt in 2025, decreased from \$3 to \$4 per watt in 2020.

How much do solar panels cost in 2025?

In 2025, average solar panel costs continue to decrease due to advancements in technology and economies of scale. Prices vary by system type, size, and installation needs. Residential solar panels typically cost between \$12,500 and \$17,500 for a 5-kilowatt system.

How much does solar cost per watt?

Technological advancements and market demand have steadily reduced prices, making solar energy more accessible. From 2010 to 2020, solar panel prices dropped by nearly 90%, with costs per watt falling from approximately \$3.86 to \$0.38 globally (source: IRENA). This decline slowed in recent years but remained consistent.

How much does it cost to install a solar system?

Labor averages \$0.50 to \$1 per watt, with total installation costs typically adding 10-20% to the overall price. Regional variations, like stricter permitting requirements or higher labor costs, can influence these expenses. Maintenance costs remain minimal for most systems.
