# 290W solar panel

## Overview

---

How much does a 290W solar panel weigh?

An average 290W solar panel is 65 x 39 inches and weighs about 18 kilograms. The majority of monocrystalline 290w modules have 60 cells, but in systems meant for commercial use this number is usually higher. They are bigger, heavier and sometimes don't fit well on the roof of a house.

How efficient is a 290 Watt solar panel?

290 watt solar panel efficiency ranges from 15 to 22.6% depending on the manufacturer. Other characteristics, such as color, frame material, weather resistance, speed of degradation and temperature coefficients vary from model to model. This allows the customer to find an ideal fit for their particular circumstances.

Are rec290tp2 solar panels weatherproof?

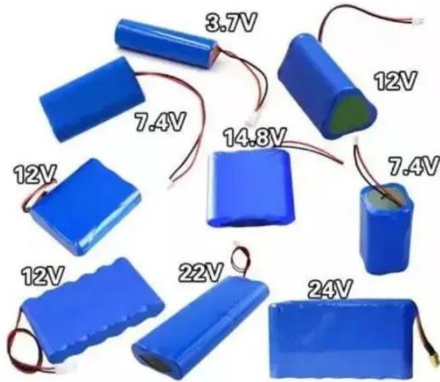

The REC290TP2 solar panels feature a weatherproof anodized frame designed to keep its appeal for many years to come. These special 120 HC solar cell PV modules are easy to install with made-to-fit cables and multiple grounding points that reduce the ground wire needed in installation.

What are Rec Twinpeak 2 series solar panels?

REC TwinPeak 2 Series solar panels feature an innovative design using 120 laser cut polysilicon HC solar cells. This results in higher panel efficiency that, when combined with the other optimized components of the module, can provide over 12 watts more power output per panel than traditional polycrystalline technologies.
