3 2v cylindrical lithium iron phosphate battery

Overview

What is a 12V Lithium iron phosphate battery?

A 12V lithium iron phosphate battery is a type of rechargeable battery that comes with a Battery Management System (BMS). The BMS in this battery protects against short circuits, overcharge, and deep discharge. It also balances cells to increase battery life, improve performance, and protect against mishandling.

What are rechargeable lithium iron phosphate batteries?

Rechargeable lithium iron phosphate batteries are those that use LiFePO_4 as the principle cathode material.

What is a cylindrical lithium ion battery?

Cylindrical cells one of the most widely used lithium ion battery shapes due to ease to use and good mechanical stability. The tubular cylindrical shape can withstand high internal pressures without collapsing. Melasta produces multiple sizes and capacities according to the customer requirement.

What is lithium iron phosphate (LiFePO_4)?

Individual pricing for large scale projects and wholesale demands is available. Utilizes lithium iron phosphate (LiFePO_4) chemistry for enhanced safety, minimizing the risk of explosion or combustion from impacts, overcharging, or short circuits. Enables rapid charging and high-current discharge, supporting continuous discharge at 1C.
