Solar system
Equip your home solar with
battery storage system

Overview

How many solar panels are in a 3KW Solar System?

Depending on which panels are used, a 3kW system will comprise of 11 to 12 solar panels which equates to roughly 20m² of roof space. How much does a 3kW solar system cost?

Because every solar installation is different we cannot provide pricing before first assessing your individual needs and requirements.

What is included in a DIY solar installation kit?

Request a quote Complete 3kW DIY solar panel kit for home installation. Each DIY solar install kit includes solar panels, microinverters and racking.

How many kilowatts does a solar system use?

The system takes up less than 184 square feet and the 225 to 500 kilowatt (kW) generated will offset much of your lighting, air conditioning and appliance usage. With the average American using 920kWh per month, this system offsets 24 to 54% of that usage.

Where can I buy solar panels?

We will customize the system for your property and calculate how much energy your solar panels will produce for you. Wire, conduit, fittings, breakers, AC/DC Disconnects (if required), junction boxes and a sub panel (if required) can be purchased at any electrical supply shop, Home Depot or Lowes.
