Overview

What are monocrystalline solar panels?

Monocrystalline solar panels are made with wafers cut from a single silicon crystal ingot, which allows the electric current to flow more smoothly, with less resistance. This ultimately means they have the highest efficiency ratings, longest lifespans, and best power ratings on the market, ahead of all other types of solar panels.

What is a SunPower 305 solar panel?

Utilizing 96 next generation SunPower all-back contact solar cells, the SunPower 305 delivers an unprecedented total panel conversion efficiency of 18.7%. The 305 panel's reduced voltage-temperature coefficient and exceptional low-light performance attributes provide outstanding energy delivery per peak power watt.

How much power does a monocrystalline solar panel have?

The best monocrystalline solar panels have power ratings upwards of 500W, with some exceeding 600W and even 700W. In contrast, you'll struggle to find a polycrystalline panel with a power rating above 400W, and they've long fallen around 20% below monocrystalline models, according to data analysts Wood Mackenzie.

How much does a monocrystalline solar & battery system cost?

A 4.5kWp monocrystalline solar & battery system usually costs around £11,307, including the price of installation. This should get you 10 solar panels, each with a 450-watt peak power rating, as well as a 5kWh battery.
