## Overview

---

Is reNew launching a 400 MW solar project in Rajasthan?

July 24th 2024, Jaipur – ReNew, India’s leading renewable energy company (NASDAQ: RNW), on Tuesday inaugurated a 400 MW solar project in Rajasthan, as part of a 600 MW PPA signed with the Solar Energy Corporation of India Limited (SECI) to generate clean energy in Rajasthan for the next 25 years.

How big is a 400kW solar power system?

A 400kW system using 370W panels will require about 1,896.3 square meters of roof to be installed. Each 370W panel measures about 1.75m x 1m. 400kW solar power systems are mostly suitable for Large industrial energy users or solar farms. This size of solar power system is classed as "Large Scale".

How much power does a 400W solar panel produce?

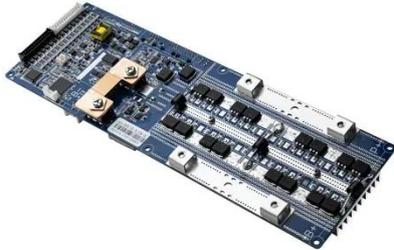

On average you can expect 1600-2600 Wh or 260-320 watts out per hour from your 400W solar panel. The difference will depend on the weather conditions & solar panel tilt angle. Under ideal conditions, you can expect 400 watts of power per hour from your solar panel but it will rarely happen.

How many square meters does a 400kW solar system require?

This is because as panels get large (in Watts) they also become a little bit more efficient. A 400kW system using 370W panels will require about 1,896.3 square meters of roof to be installed. Each 370W panel measures about 1.75m x 1m. 400kW solar power systems are mostly suitable for Large industrial energy users or solar farms.
