# **5 The first power plant-side energy storage project**

## Overview

---

Will Tesla build China's largest grid-side battery storage plant?

Tesla will build China's largest grid-side battery storage plant in Shanghai. The \$556 million project, involving over 100 Megapacks, aims to stabilize China's urban power grid. Tesla's energy expansion in China comes as demand for large-scale battery systems grows.

Will Tesla's first grid-side energy storage station be built in China?

It will be Tesla's first grid-side energy storage station to be built on the Chinese mainland. Dong Kun, general manager of Tesla China's energy business, said the station, once launched, will participate in electricity spot trading, helping balance peak and off-peak power demand in the local grids and enhance grid stability.

Why is Tesla building a battery storage facility in China?

Tesla's energy expansion in China comes as demand for large-scale battery systems grows. Tesla has signed its first agreement to build a utility-scale battery storage facility in China, marking a major step in the company's global energy ambitions despite ongoing trade tensions between Washington and Beijing.

Where is Tesla building a battery storage facility?

Plus Power's Gambit Energy Storage in Angleton, Texas. Tesla has signed its first agreement to build a utility-scale battery storage facility in China, marking a significant step in the U.S. automaker's global energy strategy.
