# **500kW Photovoltaic Energy Storage Container Used in Malta Cement Plant**

## Overview

---

What is A 500KW Megatron battery storage system?

500kW MEGATRON - 20 foot Containerized Commercial Battery Energy Storage System designed to for On-Grid and Renewable Energy Projects.

Can a solar power system save CO<sub>2</sub> in cement industry?

Concentrated solar power system is designed for cement industry. Substitution of required thermal energy ranging from 100% to 50% is studied. 7600 heliostats with 570 ha land required for 50% conventional energy replacement with solar energy. Selected conventional cement plant could save 419 thousand tons of CO<sub>2</sub> annually.

Can a cement plant use solar heliostats?

Scaling up solar reactors, transportation system for raw and calcined material, and storing of calcined materials are the major barriers. Conventional cement plant that is situated in a location with a DNI value of more than 438 (W/m<sup>2</sup>) can use this solar design model. It must have adequate land for installing a large number of heliostats.

How calcined meal is used in a solar cement plant?

Solar cement plant operation during the day with a solar multiple (SM) > 1. Once more, the storage or conventional calciner makes up the difference between the generated calcined material and the design point. After the solar reactor achieves its optimum value, the calcined meal is immediately provided for the subsequent process.
