# 50kw small solar power station generator

## Overview

---

What is a 50 kW solar kit?

A 50 kW solar kit is a complete PV solar power system that includes solar panels, DC-to-AC inverter, rack mounting system, hardware, cabling, permit plans, and instructions. These grid-connected solar kits are designed for homes or businesses and come with almost everything needed to set up the system quickly.

What makes up a complete 50kVA solar power plant?

The following configurations make up a complete 50kva 50kW solar power plant: 1)87pcs 16mm<sup>2</sup>\*35CM,6pcs 16mm<sup>2</sup>\*2M battery cable,20M 16mm<sup>2</sup> cable with battery terminal. Optional solar mounting support, PV combiner boxes, and cables. PVMARS provides a complete turnkey PV energy storage system solution.

How much power can a 50kW Solar Kit produce monthly?

A 50kW Solar Kit could produce an estimated 6,200 kilowatt hours (kWh) of alternating current (AC) power per month, assuming at least 5 sun hours per day with the solar array facing South. This is equivalent to 50,000 watts of DC direct current power.

What kind of battery does a 50kw solar plant use?

The gel battery of this 50kw solar plant is designed with 90pcs 12v200ah batteries with a total capacity of 216kWh. In addition, PVMARS also offers lithium battery options. If your installation location is limited and you want more power, our small-volume 216kWh lithium battery is also an excellent choice.
