# 60V Inverter Performance

## Overview

---

Do I need a 60Hz inverter?

Here in the US, things run at 60Hz, in Europe and most other places around the world, things run at 50Hz. You'll most likely require a 60Hz inverter if you are running a device intended to run on US power. We like to go camping and travel quite frequently.

Can a single phase inverter output 240V 60Hz?

These single phase inverters can be programmed to output 240V 60Hz for North American applications. Couple with an Autotransformer to do neutral forming for 120/240V split phase applications. We can also stack these inverters in three phase configurations to do 230V/400V WYE (50Hz or 60Hz).

What is the impulse endeavor inverter?

The Impulse Endeavor Inverter gives our Flex-Force Power System the capacity to charge everything from mobile phones and laptops to portable lights and fans. It's a portable inverter that generates power where you need it from any 60V\* battery in the Flex-Force lineup. \*Battery manufacturer rating = 60V maximum & 54V typical usage.
