

## Overview

---

Which solar inverter is suitable for mega-solar power plant deployment?

SOLAR WARE 630 is a highly engineered 1000V PV inverter suitable for mega-solar power plant deployment. TMEIC's proprietary 3-level topology redefines utility scale PV system with industry's leading efficiency level and smallest footprint.

Who needs high performance solar inverters?

System integrators who require high performance solar inverters for large photovoltaic power plants and industrial and commercial buildings can benefit from ABB's PVS800 central inverters. These inverters are available from 100 kW up to 630 kW and are optimized for cost-efficient multi-megawatt power plants.

What is the power range of the ABB solar inverters?

The ABB solar inverters are available from 100 kW up to 630 kW. They are optimized for cost-efficient multi-megawatt power plants and have been developed on the basis of decades of experience in the industry and proven technology platform.

Which solar inverters are suitable for multi-megawatt power plants?
