700va inverter price

Overview

How many watts can a 700 watt inverter run?

The inverter can run a 700 watt load for 2.4 hours. Notice that we divided 31.2 amps with 75ah, not 150ah. That is because a deep cycle battery has a 50% discharge rate (DOD) so only 75ah is usable. If you have a new AGM or gel battery the DOD can reach 70%. For lithium batteries you can fully discharge it without causing damage.

What is a pure sine wave home inverter?

The pure sine wave home Inverter is equipped with features such as a water level indicator which helps the consumers to track battery water level hassle-free. A pure sine wave output makes it highly efficient and helps you to save huge on electricity bills and is safe for sensitive appliances with sinewave output.

What is livguard sine wave inverter?

Introducing the Livguard Sine Wave Inverter, where innovation meets uninterrupted power supply. Designed for modern homes and the most demanding electrical loads, this inverter guarantees a seamless and stable power flow.
