# A factory that makes energy storage batteries in Belmopan

## Overview

---

Where are energy storage batteries made?

\* U.S. carmaker Tesla broke ground on a mega factory in Shanghai on Thursday to manufacture its energy-storage batteries. \* It is expected to begin mass production in the first quarter of 2025, with an initial capacity of 10,000 Megapack units a year. \* As the global renewables powerhouse, China is a major market for energy storage.

Why is Tesla launching a battery factory in China?

The battery factory marks the company's first energy storage system factory outside the US to manufacture its energy storage batteries known as Megapacks, and is also another major investment for Tesla in China following the inauguration of its Shanghai Gigafactory in 2019.

Will Tesla's battery products be supplied to the global market?

The battery products will be supplied to the global market, according to a Shanghai Observer report. Energy storage has become an important profit growth driver for Tesla. According to Tesla's third-quarter 2024 financial report, revenue from the energy generation and storage business reached \$2.376 billion, a year-on-year increase of 52.4 percent.

Will Tesla's Shanghai energy storage megafactory expand?

At the launching ceremony, Mike Snyder, Tesla's vice president of energy and charging, noted that Tesla's Shanghai energy storage Megafactory is scheduled to ramp up production this quarter, which will assist Tesla to expand into more markets. "We've witnessed the incredible speed of Shanghai and Tesla once again.
