## Overview

---

Will Southeast Asia install a PV system in 2022?

Moreover, it is forecasted that the Southeast Asia region is going to install another 27 GW of PV capacity between 2021 and 2025 . The development and government support toward PV system installation has been summarized the Table 1 below. Fig. 2. ASEAN market cumulative PV system installation in 2022 . Table 1.

Are ASEAN countries maximizing solar irradiation opportunities?

Looking at this high level of solar irradiation, ASEAN countries are maximizing the opportunity by installing photovoltaic (PV) systems. The latest market data of PV installation in Year-2020 has shown a total power output of 26.6 GW (1 GW = 109 W) (See Fig. 2).

Are rooftop solar systems a good idea for the ASEAN region?

Many countries in the ASEAN region have adopted this rooftop solar system idea and the demand is continually increasing thanks to its potential long-term benefit in reducing the electricity cost (Fig. 6). Moreover, rooftop solar systems become a timely and resource-efficient way for the countries to meet it's renewable energy goals.

What is the installed capacity of floating PV module in ASEAN?

In the ASEAN region total installed capacity of floating PV was below 1 MW till 2019, but large-scale floating PV module installations grew rapidly in Indonesia, Singapore, Thailand, Malaysia, and Philippines from year 2020 and onwards.
