Algiers energy storage power supply export shipment

Overview

Is Algeria ready to export surplus electricity to Europe?

This was recently confirmed by the Algerian president, who declared that Algeria is ready to export its surplus electricity production to Europe in the context of the energy crisis plaguing the continent (Nova News, 2022b, Reuters, 2022). 4.6. Political support and industrial promotion.

Should Algeria export solar electricity?

While the export of solar electricity holds promise, it requires careful consideration of its potential adverse effects on the Algerian economy and energy security. Therefore, adopting a meticulous and balanced approach to electricity exports is essential to mitigate these impacts and ensure long-term economic stability and resilience in Algeria.

How much electricity does Algeria export in 2021?

According to IEA, Algeria's electricity exports reached 0.6 TWh in 2021, of which 0.4 TWh were exported to Tunisia. The exports are part of Algeria's strategy to diversify its economy and increase its revenue from energy exports.

Does Algeria have a power shortage?

However, as has been reported by various news outlets and organizations, including the United States Energy Information Administration (EIA) and Reuters, Algeria also faces domestic electricity shortages during peak demand periods, which highlights the need to develop and invest in renewable energy sources to meet both domestic and export demands.
