All new energy small container stations in ASEAN

Overview

Does ASEAN have technology options to decarbonize power sector?

Faced with energy transition objectives, the ten countries of the Association of Southeast Asian Nations (ASEAN) have technology options to decarbonize power sector. This study investigates the hypothetical decarbonization pathways for ASEAN's power sector.

What does the ASEAN Energy Centre do?

The Centre holds a crucial role as a catalyst, knowledge hub, and think tank for the economic growth and integration of the ASEAN region by initiating and facilitating multilateral collaborations as well as joint and collective activities on energy.

How can the ASEAN Power Grid facilitate investments in renewables?

To facilitate investments in renewables in ASEAN, it is critical to overcoming the barriers in renewable energy legislation, energy governance, and business environment. 28 Cooperation through the ASEAN Power Grid brings economic benefits to the region as a whole, and thus improves the affordability for energy transition.

Are small modular reactors a transitional energy solution in Southeast Asia?

As part of their energy transition efforts, many ASEAN countries view small modular reactors (SMRs), which have a lower electricity output, as a transitional energy solution. Indonesia has made the most progress, with 29 potential sites already confirmed. However, the overall development of SMRs in Southeast Asia still faces three major challenges.
