A pure sine wave inverter generator is necessary when you need to power sensitive electronics. Some examples include running laptops, desktop computers, gaming consoles, audio equipment, or medical devices that require a stable and clean power supply.

A sine wave inverter can power a chainsaw, but it must be able to supply enough surge power. For example, a chainsaw that requires 1000 watts to run may need 2000 watts or more to start. Sine wave inverters are designed to output the same voltage as standard electrical outlets, so they can safely power most appliances, including chainsaws.
