

BLINK SOLAR

Ankara integrated solar street light

Overview

Why should you choose Hei solar LED street lights?

HeiSolar focus on developing and manufacturing customized outdoor solar LED lighting systems for a wide range of lighting applications. Integrated solar street lamp promotes safety for drivers as their illuminance is greater than traditional street lights. You can install them effectively on main roads, highways, rural roads, and roadways.

Why should you choose integrated solar street lights?

Integrated solar street lamp promotes safety for drivers as their illuminance is greater than traditional street lights. You can install them effectively on main roads, highways, rural roads, and roadways. Installation is very easy and price per street light unit is cheaper than other brands.

How long does it take to install all-in-one solar street lights?

HeiSolar's All-in-One Solar Street Lights are very easy to install. You can finish the installation as fast as 5 to 10 minutes depending on the type (All in one FL Series, KD Series or Thor Series or KC Series), without any need for trenching or a professional electrician. You can find the whole installation procedure for each in the links below.

Where should solar street lights be used?

Where solar street lights can be optimally used can be around site perimeters. These areas require a strong source of lighting such as those surrounding buildings, industrial areas, factories, manufacturing plants and power station perimeters as they usually operate 24 hours a day.
