What is the global battery management system (BMS) market size?

The global Battery Management System (BMS) Market is expected to grow from USD 7.8 billion in 2023 to USD 18.4 billion by 2028, at a CAGR of 18.7% from 2023 to 2028. A battery management system is an electronic system that monitors and manages the operation and functionality of a rechargeable battery such as lithium-ion.

What is a battery monitoring system (BMS)?

BMS performs several functions, including monitoring the battery's state of charge, state of health, and state of safety. The design and operation of BMS are critical in ensuring the safety and efficiency of EV batteries.

 Other Information on Battery Management Systems
 Battery management systems are integral in monitoring automotive batteries and lithium-ion battery modules in smartphones. Lithium-ion batteries, known for their efficiency, require careful management to prevent accidents and optimize performance. Their application extends to automotive batteries, particularly with the growing demand for EVs. See more on us.
