## Overview

---

What is a battery pack?

The battery pack consists of an in-built BMS which ensures safe operation of the cells. The driving power and sensitivity of thermal paper, set different printing speed required. Max printing speed is 75mm/sec. Our best pack for various needs and budgets.

What is battery pack assembly?

Pack is the process of assembling a lithium battery cell, which may be a single battery or a serial-parallel battery module. The spot weld process is important in the entire battery pack process. Battery pack assembly involves 18650 cells, spot weld, PCB or BMS weld, bracket, and fish paper.

What are the three parts of battery pack manufacturing process?

Battery Module: Manufacturing, Assembly and Test Process Flow. In the Previous article, we saw the first three parts of the Battery Pack Manufacturing process: Electrode Manufacturing, Cell Assembly, Cell Finishing. [Article Link](#) In this article, we will look at the Module Production part.
