## Overview

---

Why are solar panels so expensive in Greece?

Global demand, industrial accidents, environmental disasters, exchange rates and the impact of the coronavirus pandemic could all be contributing to a rapid rise in the cost of solar power panels in Greece since the beginning of July. Industry sources reported price hikes of up to 25%.

How much does solar power cost in Greece?

The average annual yield for solar PV in Greece is around 1,400-1,600 kWh/kWp. However, the actual yield can vary depending on the location, the orientation of the solar panels, and the system's efficiency. <sup>2</sup> The average cost of electricity in Greece for households is around \$0.12 per kWh.

Should you invest in solar panels in Greece?

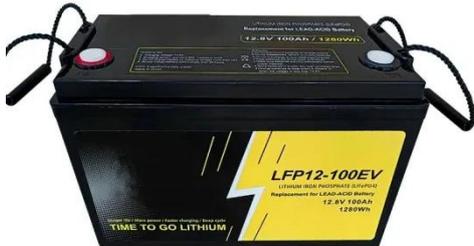

When exploring the solar panel industry in Greece, several key considerations emerge. The country's abundant sunlight provides a significant opportunity for solar energy production, making it an attractive market for both investors and consumers.

Why are investors worried about solar power in Greece?

Investors in solar power in Greece are concerned because of a sharp rise in prices for the equipment in the past two months, reversing the declining trend in the cost of photovoltaic technology registered over the past years, according to a local media report. Developers told Energypress the jump ranged from 10% to 25%.
