Battery cabinet cell price trend analysis

Overview

What is trendforce lithium battery research?

TrendForce Lithium Battery Research provides intelligence on market prices and interpretations of market price trends through close and frequent communications with major suppliers, merchandizers, and traders of China's lithium battery supply chain, as well as cross-research and tracking on monthly spot prices for key products of the supply chain.

What is the battery Cost Index (BCI)?

Note: the 'Table' references below relate to data that can be found in the 'Methodology' tab of the Excel sheet that accompanies the monthly BCI pdf. The Battery Cost Index (BCI) is a monthly report that provides detailed insights into the cost structure of various commercial Lithium-ion cells from January 2020 to the present.

Are battery storage costs based on long-term planning models?

Battery storage costs have evolved rapidly over the past several years, necessitating an update to storage cost projections used in long-term planning models and other activities. This work documents the development of these projections, which are based on recent publications of storage costs.

How will battery price issues affect the automotive supply chain?

These battery price issues could impact the overall automotive supply chain. The price of LFP cells is over 20% lower than nickel cobalt manganese (NCM) cells. The average price of an LFP cell was just under \$60/kWh in 2024.
