Battery charging in energy storage cabinet in Toronto Canada

Overview

Does Toronto Hydro have a battery energy storage system?

Toronto Hydro recently installed a battery energy storage system (BESS) with Renewable Energy Systems Canada and support from the Province of Ontario's Smart Grid Funds. The Bulwer BESS project is a 2 MW/2 MWh BESS located at the Bulwer Municipal Station (MS), a decommissioned 4.16kV Toronto Hydro electrical substation, located in downtown Toronto.

What is a battery energy storage system?

Battery Energy Storage Systems (BESS) are tools that store electrical energy. Within Canada, all energy storage projects currently under construction are BESS. Proposed and under-construction projects have a power range between 1 MW and 411 MW, with an average storage capacity range of 0.5 hours to 6 hours.

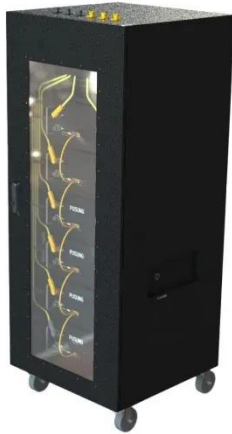

Who is energy storage Canada?

Energy Storage Canada is the only national voice for energy storage in Canada today. We focus exclusively on energy storage and speak for the entire industry because we represent the full value chain range of energy storage opportunities in our own markets and internationally.

Who owns the electro-chemical battery storage project?

The electro-chemical battery storage project uses lithium-ion battery storage technology. The project was announced in 2018. The project is owned by Toronto Hydro and developed by Toronto Hydro; Renewable Energy Systems. Buy the profile here. For more details on the latest energy storage projects, buy the project profiles here.
