Battery energy storage fee standards in Mumbai India

LPW48V100H
48.0V or 51.2V

Overview

How much battery energy storage capacity is available in India?

Between 2022 and May 2025, India auctioned approximately 12.8GWh of battery energy storage system (BESS) capacity for both hybrid and standalone applications. However, only about 219MWh of BESS capacity is reported to be operational, leaving a large pipeline of projects under construction.

Will Tata Power install a 100 MW battery energy storage system in Mumbai?

Mumbai, 7th April, 2025 – Tata Power, India's largest integrated power company and a trusted electricity provider to approx. 8 lakh residential and commercial consumers, has received approval from the Maharashtra Electricity Regulatory Commission (MERC) to install a 100 MW Battery Energy Storage System (BESS) in Mumbai over the next two years.

What is Adani Electricity's energy storage tender?

Issued in May 2025, the tender marks a critical move toward strengthening the city's power supply infrastructure through advanced storage technologies. This landmark tender by Adani Electricity allows developers to submit bids for either Battery Energy Storage Systems (BESS) or Pumped Storage Projects (PSP).

What is the share of hybrid energy tender capacity in India?

With a rise in preference for firm renewable energy, the share of hybrid tendered capacity has increased from about 12% in 2021 to over 49% in 2024 in the overall renewable energy tenders. Between 2022 and May 2025, India auctioned approximately 12.8GWh of battery energy storage system (BESS) capacity for both hybrid and standalone applications.
