Overview

How do you install a car battery?

To install a car battery, insert each battery negative (-) side first, pushing it into the coil and then into the compartment. Do NOT insert batteries positive (+) side first. Place the battery door back over the compartment and press it gently down until the latch snaps securely into place. Power tip!

How to install a new battery?

Find the scissors in the drawer under the book with colored pages and use them to cut the ropes on the white object on the second floor. Now we can insert the new battery into the device and turn it on. Take the new battery from the second floor and insert it into the device. Press the red button on the device to activate it. Take the loudspeaker.
