# Berlin Substation Energy Storage

## Overview

---

Does Germany need energy storage systems?

While around 254 terawatt-hours (TWh) of electricity were generated from renewable energy in Germany in 2022, 600 TWh of electricity are expected to come from renewable sources by 2030. Germany is particularly dependent on a market ramp-up of energy storage systems, especially battery storage systems. What role do energy storage systems play?

.

How is a battery energy storage system (BESS) reimagining a business model?

It is in some ways replicating the business model it has used in the UK, Italy, Australia and Sweden so far—entering equity investment and joint development agreements with local development partners to embark on large-scale battery energy storage system (BESS) projects in strategic locations.

Does BW ESS have a development pipeline for Germany?

While BW ESS is in the process of creating a development pipeline with its partner MIRAI Power and has not yet finalised its model for Germany with regards to how projects will be contracted for with offtakers, Roberto Jimenez said the developers will likely be looking for ways to secure contracted revenue.

What is the energy storage strategy?

The strategy paper provides an overview of the measures and challenges involved in establishing energy storage systems. The energy storage strategy aims to promote the expansion and integration of energy storage systems and thus support the energy transition. By 2035, the energy sector in Germany should be largely free of greenhouse gas emissions.

## Berlin Substation Energy Storage

---

### Berlin , Mynd Tower , 146m , In Bau

^^ Hä? Es wurde doch nun schon mehrmals erwähnt: Es handelt sich hier um eine 3D-Architektur-Visualisierungs-Firma aus Berlin! Nicht um konkrete Planungen oder ...
