Overview

What is a hybrid axpert inverter?

Some "hybrid" inverters allow you to connect equipment to the inverter to prevent export to grid and it will only import from grid. Really there is no easy way to explain this, you need to understand electric systems to understand these installations. Axpert inverters are not grid-tied, they are closer to these "hybrid" systems.

Are axpert inverters grid-tied?

Axpert inverters are not grid-tied, they are closer to these "hybrid" systems. To use an Axpert you must connect the equipment downstream from the inverter. But for grid-tied, you wouldn't need to do that, you connect it in parallel and your power usage will go down and your meter starts running backward when you produce more power than you need.
