

BLINK SOLAR

Boston Energy Storage Container Long-Term Discount

- ☑ High energy density and long cycle life
- ☑ Modular structure

No need to replace the battery

Shorter charging time

Meets 99% EV car

Overview

What is Massachusetts' energy storage procurement?

The energy storage procurement aligns with Massachusetts' 2024 legislation, An Act Promoting a Clean Energy Grid, Advancing Equity and Protecting Ratepayers, which directs the state to procure energy storage totaling 5 GW by J. The procurement targets 3.5 GW of mid-duration storage (four to ten hours), totaling 14,000 to 35,000 MWh.

Will Massachusetts get 5 GW of energy storage by 2030?

Massachusetts is initiating efforts toward its 2024 goal of procuring 5 GW of energy storage by 2030. A draft request for proposals (RFP) for 1.5 GW of 4- to 10-hour energy storage resources has been released. This initial RFP follows the state's 2024 legislation mandating the procurement of 5 GW of storage capacity by 2030.

When will long-term contracts for energy storage projects be released?

The exact release date for the Long-Term Contracts for Energy Storage Projects remains "TBD," though a tentative schedule in the draft suggests a public release of the RFP on J. The RFP includes scheduled periods for questions and feedback through the fall, with proposal submissions due by Sept. 10.

How much does a long-term storage project cost?

Upon executing long-term storage contracts, developers must provide a security deposit of \$40,000 per MW, totaling up to \$60 million. With estimated costs around \$200/kWh, total project value could range from \$2.8 billion to \$7 billion, depending on the chosen storage capacities.
