# **Boston lithium energy storage power production**

## Overview

---

Will Massachusetts help Boston-power build a new energy storage facility?

Enabling energy storage to continue to flourish in Massachusetts, state officials are working closely with Boston-Power to pursue state and federal financial incentives that will help the company to fulfill its plans of building the Auburn facility.

Who is pure lithium?

About Pure Lithium Pure Lithium is a disruptive Boston-based lithium metal battery technology company led by its founders, inventor and lithium expert, CEO Emilie Bodoïn, and world-renowned battery and metallurgical expert, MIT Emeritus Professor Donald R. Sadoway, as full-time CSO.

Where are lithium-ion batteries made?

Currently, nearly all lithium-ion batteries in the world are manufactured in Asia. The Commonwealth will offer up to \$9 million in matching financing to support the company's planned manufacturing operation in Auburn. Boston-Power selected the Auburn site based on proximity to its headquarters.

Could a new lithium battery outperform today's lithium-ion cells?

Boston-based Pure Lithium is building a pilot plant for a new kind of lithium metal battery, one it claims could outperform today's lithium-ion cells, and, crucially, be built entirely without Chinese inputs.
