Brazilian Energy Storage Power Station Investment Company

Overview

Will Brazil conduct the first energy storage auction?

Brazil is set to conduct the country's first-ever energy storage auction for adding batteries and storage systems to the national power grid.

Why is energy storage important in Brazil?

Cemig CEO Reynaldo Passanezi noted that energy storage systems and expanded transmission lines will be essential as Brazil integrates larger volumes of renewable energy into the grid in the coming years. Cemig is already testing battery storage technology through a pilot project in Serra da Saudade, Brazil's smallest city.

Will Brazil's first electricity auction drive \$450m investment?

Brazil is set to conduct its first auction for adding batteries and storage systems to the national power grid, as reported by Reuters. The auction, to take place in June 2025, will include 300MW energy capacity purchase that could drive an estimated \$450m in investments from winning bidders, according to consultants Oliver Wyman.

Is Brazil ready for utility-scale energy storage?

"The demand for utility-scale energy storage in Brazil is poised to grow exponentially as the country continues its transition to renewable energy and strengthens its grid infrastructure," said Marcelo Rodrigues, Sales & Innovation VP of UCB.
