# **Bulgaria plans new energy storage industrial park**

## Overview

---

Why is Bulgaria building a new power plant?

Energy Minister Zhecho Stankov hailed the installation as a milestone for Bulgaria's energy independence and regional leadership. "This facility will help maintain the most stable energy system in Southeast Europe," he said. "We are the pillar of the Balkans in balancing electricity systems."

How big is Bulgaria's energy storage capacity?

A recent capacity tender has already allocated nearly 9,713 MWh to upcoming projects, further reinforcing the country's ambitions in energy storage. Before the commissioning of the Lovech facility, Bulgaria's largest BESS was a 25 MW / 55 MWh system developed by Renalfa IPP in 2024.

Where is a Bess power plant located in Bulgaria?

A BESS facility of 124.1 MW in operating power was inaugurated in Lovech in Bulgaria. Located next to a photovoltaic park within Balkan Industrial Park, it is part of the country's first closed licensed power distribution system.

Why is energy storage important in Bulgaria?

In 2023, the Bulgarian Parliament introduced specific legislative amendments regulating the electricity storage. The rationale behind the amendments is to provide balance and flexibility to the power system. Energy storage is a crucial step for low-carbon economy since it enhances the security of supply and the development of renewables capacity.

## Bulgaria plans new energy storage industrial park

---

### Bulgaria opens EU's largest battery energy ...

Bulgaria inaugurated what it says is the largest operational battery energy storage facility in the European Union on May 22, in a move officials say ...

---

### EU's Largest BESS Project Now Online in Bulgaria

The country in a recent tender awarded just more than 9.7 GWh of energy storage contracts. The new BESS is located adjacent to a 106.2-MW solar energy park in the Balkan ...
