# Burundi investigates radio interference from 5G base stations

## Overview

---

Are 5G base stations harmful to radio altimeters?

9 Report<sup>24</sup> found that all aircraft types and multiple operations received interference from both simulated fundamental and spurious 5G emissions. The RTCA Report concluded that “5G base stations present a risk of harmful interference to radio altimeters across all aircraft types, wi.

Are 5G base stations a threat to the aviation sector?

Conclusion Potential interference by 5G base stations operating on frequencies adjacent to the altimeters' band is of concern to the aviation sector, where it could cause disruptions and liabilities to their commercial transport business and operations.

Can beamformer protection reduce interference from 5G base station to radio altimeter?

Received signal of the radar altimeter at 116 ft in the rural scenario without beamformer protection. 5. Conclusions In this paper, an adaptive beamforming scheme was proposed to mitigate interference from the 5G base station to the radio altimeter.

Does 5G C-band interference affect radio altimeters?

ert for Operators (SAFO) on the Risk of Potential Adverse Effects on Radio Altimeters when Operating in the Presence of 5G C-Band Interference<sup>17</sup>. Concurrently, two Airworthiness Directives (ADs), FAA ADs 2021-23-12 and 2021-23-13, were issued: An Airworthiness Directive on altimeter interference for fixed wing air

## Burundi investigates radio interference from 5G base stations

---

### 5G Mobile Communication-Technology Enablers

In order to limit the interference, SRC needs to control the scheduling and power level to be configured by the base stations at different tier level in both downlink and uplink.

### Guidance on safeguarding measures to protect Radio ...

simulated 5G interference, assessing it against radio altimeter performance data from the major manufacturers in common and real-world scenarios. With the regulatory limits ...

### Deployment Protection for Interference of 5G Base Stations

In this manuscript, we present a novel deployment protection method aimed at safeguarding aeronautical radio altimeters (RAs) from interference caused by fifth-generation ...

## Simulation of 5G interference to substation secondary ...

This paper analyzes and deduces the electric field intensity produced by 5G base stations and terminals within substations, investigates the potential interference of 5G on ...

---

## Deployment Protection for Interference of 5G Base ...

Abstract: In this manuscript, we present a novel deployment protection method aimed at safeguarding aeronautical radio altimeters (RAs) from interference caused by fifth ...

---

## Advanced Optical-Radio Communication System for 5G Base Stations ...

This research aims to create trustworthy, fast communication technologies for 5G and beyond. The design investigates the possibilities of Free-Space Optical (FSO) ...

---

## Adaptive beamforming scheme for coexistence of 5G base ...

In this paper, an adaptive beamforming

scheme was proposed to mitigate interference from the 5G base station to the radio altimeter. Compared to the conventional ...

---

## Analysis of Mobile and Internet Network Coverage: ...

This analysis should also include an investigation of potential constraints associated with interference in the signal transmission system, including a review of frequency ...

---

## 5G interference with aviation altimeters: technology and ...

Potential interference by 5G base stations operating on frequencies adjacent to the altimeters' band is of concern to the aviation sector, where it could cause disruptions and ...

---

## Deployment Protection for Interference of 5G Base Stations ...

In this manuscript, we present a novel deployment protection method aimed at safeguarding aeronautical radio altimeters (RAs) from interference caused by fifth-generation ...

## Interference Challenges on 5G Networks: A Review

However, interference challenges due to simultaneous usage of the same spectrum in the different cells, dense deployment of base stations (BSs), and massive use of ...

## Analysis of Mobile and Internet Network ...

This analysis should also include an investigation of potential constraints associated with interference in the signal transmission system, ...

## Analysis of Electromagnetic Interference ...

An analytical method is introduced to assess the susceptibility of radio

altimeter (RA) receivers to adjacent-band fifth-generation (5G) ...

## Analysis of Mobile and Internet Network Coverage ...

This analysis should also include an investigation of potential constraints associated with interference in the signal transmission system, including a review of frequency resources ...

## Interference Mitigation Technology Solution for 5G Base Stations ...

Widespread adoption of 5G systems may interfere with fixed satellite service (FSS) earth stations operating in nearby frequency bands. Some countries and regions are currently ...

## Deployment Protection for Interference of 5G Base Stations ...

In this manuscript, we present a novel deployment protection method aimed at safeguarding aeronautical radio altimeters (RAs) from interference caused by fifth-generation ...

---

## Research on 5G Base Station to Satellite Earth Station Interference ...

In this paper, the saturation interference from 5G base stations to the existing FSS above 3600 MHz is analyzed and the coexistence solution is achieved, which can reduce the ...
