# **Busan Office Building Energy Storage Project in South Korea**

## Overview

---

Are South Korean companies investing in energy storage systems?

Less than a decade ago, South Korean companies held over half of the global energy storage system (ESS) market with the rushed promise of helping secure a more sustainable energy future. However, a string of ESS-related fires and a lack of infrastructure had dampened investments in this market.

How sustainable are South Korea's buildings?

Buildings are at the center of South Korea's sustainability challenge. They consume nearly 20% of the nation's total energy and account for over 60% of urban greenhouse gas emissions.

Does South Korea need a building energy management system?

To ensure continuous performance, South Korea also requires energy monitoring and control in large-scale facilities: Building Energy Management Systems (BEMS) are mandatory in new or expanded public buildings over 10,000 m<sup>2</sup>, with growing adoption in the private sector.

What is Ulsan substation energy storage system?

The Ulsan Substation Energy Storage System is a 32,000kW lithium-ion battery energy storage project located in Namgu, Ulsan, South Korea. The rated storage capacity of the project is 8,000kWh. The electro-chemical battery storage project uses lithium-ion battery storage technology. The project was announced in 2016 and will be commissioned in 2017.
