In the planning stage of the power system, the Chinese government should consider the safety, economic and social benefits of energy storage.

What is the business model of energy storage in Germany?

The business model in the United States is developing rapidly in a mature electricity market environment. In Germany, the development of distributed energy storage is very rapid. About 52,000 residential energy storage systems in Germany serve photovoltaic power generation installations. The scale of energy storage capacity exceeds 300MWh .

What is shared energy storage & other energy storage business models?

Through shared energy storage and other energy storage business models, the application scope of energy storage on the power generation side, transmission and distribution side, and user side will be blurred. And many application scenarios can realize the composite utilization of energy storage according to demand.
