Where does SSE Renewables operate?

SSE Renewables operates across the United Kingdom, Ireland, Continental Europe, and Japan. ENGIE UK is a utility company and Independent Power Producer (IPP) specializing in renewable energy generation, flexible energy storage, and energy supply solutions for businesses.

Why do we need energy storage systems?

Energy storage systems also served as a means of increasing power utilization and increased power utilization efficiency rates. This helps balance energy in various time ranges to match demand and supply. The installation of renewable energy sources has grown significantly in Europe.

Are battery energy storage systems viable?

Battery energy storage systems, coupled with renewables, such as wind and solar, are technically and commercially viable for extensively increasing grid stability. Europe is undergoing an energy transformation, expected to intensify over the coming years.

What is energy storage system (ESS)?

An Energy Storage System, often abbreviated as ESS, is a storage system that captures energy produced at one time from any energy-producing source for use at a later time as per the convenience of the end user to reduce imbalances between energy demand and energy production.
