Cambodia energy storage electricity price

Overview

How much does electricity cost in Cambodia?

Electricity prices in Cambodia are among the highest in the region, topping USD 0.137 per kWh. This is considerably more than neighbouring countries. The price of electricity in Cambodia not only impacts the competitiveness of Cambodian industries but also limits access to reliable power for a significant segment of the population.

Why are electricity prices so high in Cambodia?

The high electricity cost for consumers results from the quantity of imported energy and the outdated energy grid. Electricity prices in Cambodia are among the highest in the region, topping USD 0.137 per kWh. This is considerably more than neighbouring countries.

Why is Cambodia's energy security so important?

Cambodia's electricity grid is ageing and cannot meet the country's rapidly growing energy demands. As a result, the country's electricity prices are some of the highest in the region, and its infrastructure suffers from quality issues. Tackling these challenges is a core component of the country's long-term energy security.

What is Cambodia's electricity supply?

The composition of Cambodia's electricity supply is a blend of domestic production and international imports. In 2022, over 25% of the country's energy was imported from Thailand, Laos and Vietnam. Due to the country's high reliance on hydropower, power demand typically outstrips domestic supply during the dry season.

Cambodia energy storage electricity price

Price of Electricity

Electricity prices in Cambodia not only affect the competitiveness of Cambodian industry, but also limit access to reliable energy for a significant portion of the population.

Cambodia Residential Energy Storage Market (2025-2031)
