Cameroon Douala solar Components Project

Overview

How much solar power does Cameroon produce a year?

Seasonal solar PV output for Latitude: 4.0575, Longitude: 9.691 (Douala, Cameroon), based on our analysis of 8760 hourly intervals of solar and meteorological data (one whole year) retrieved for that set of coordinates/location from NASA POWER (The Prediction of Worldwide Energy Resources) API: Average 4.20kWh/day in Summer.

How to maximize solar PV output in Douala Cameroon?

Maximise annual solar PV output in Douala, Cameroon, by tilting solar panels 5degrees South. <p>Douala, Cameroon, situated at latitude 4.0575 and longitude 9.691, offers a promising location for.

Why is Douala a good location for solar PV installations?

This consistent year-round production makes Douala an excellent location for solar PV installations. The minimal variation between seasons ensures a reliable energy supply throughout the year, with winter and spring being particularly favorable for solar generation.

Where are solar photovoltaic power plants located in Cameroon?

For this purpose, we have chosen the solar photovoltaic power plants in the Far North and Littoral regions of Cameroon, where we will estimate, for each of them, the influencing parameters, followed by an exergy and economic analysis, with a simulation at the end of the chain.
