

## BLINK SOLAR

# Can Huawei use the global solar container communication station inverter

## Overview

---

What is Huawei smart dongle 4G?

Huawei Smart Dongle-4G supports the communication between the inverters and your solar management system via 4G connection and hassle-free plug and play. WLAN access point enables intelligent power management and plant maintenance. Both FusionSolar SmartPVMS and the third-party management system can be bound.

Which management system is supported by Huawei fusionsolar smart PV?

Huawei management system: FusionSolar Smart PV Management System with the software version of SmartPVMS V500R007C00SPC110 or later. You are advised to use the latest version. Third-party management system: A third-party management system is supported. For details, see the third-party management system documentation.

How many inverters can a smart dongle support?

Via 4G connection, Smart Dongle supports up to 10 inverters to communicate with the solar management system through hassle-free plug and play. Once plugged in, the WLAN access point can be used for local deployment to realize intelligent power management and plant maintenance.

Can a slave inverter communicate with a dongle?

Slave inverters can communicate with the Dongle through cascading. If multiple inverters are cascaded, use either a Dongle or a SmartLogger for networking. You cannot use two networking methods at the same time. The Smart Power Sensor connects to the RS485-2 and RS485\_2 ports, or 485B2 and 485A2 ports on the master inverter.

## Can Huawei use the global solar container communication station in

---

### Smart Dongle-4G , HUAWEI Smart PV Global

Huawei Smart Dongle-4G supports the communication between the inverters and your solar management system via 5G connection and hassle-free plug and play. WLAN ...
