# **Can lithium batteries for electric tools be placed in an iron box**

## Overview

---

All batteries should be placed in dedicated, non-conductive storage containers to prevent accidental short circuits if terminals contact metal tools or debris. Can a lithium battery be placed in an external battery bin?

Lithium batteries must NEVER be placed in internal battery bins (tubes) or external battery bins. Please note this document does NOT cover guidance for e-scooters, electric bikes and non-UoB vehicles. 2. Specialist use (e.g. UAVs).

How do you store a lithium ion battery?

For long-term storage, always store them with a charge level between 40% and 80%. Storing lithium-ion batteries fully charged can reduce capacity while storing them completely discharged may cause the battery to fall into a deep discharge state, rendering it unusable. Store batteries in a cool, dry place, away from direct sunlight and heat sources.

What is a lithium battery used for?

Specialist use (e.g. UAVs) This section establishes requirements and best practices for lithium batteries associated with University of Bristol (UoB) operation of Unmanned Aerial Systems (UAS) and other such powered devices, i.e. remote-controlled cars. It also covers power tools such as rechargeable drills.

Is it safe to store lithium ion batteries in the House?

Yes, it is generally safe to store lithium-ion batteries in the house. However, take precautions such as avoiding extreme temperatures, preventing physical damage, and using fireproof containers for an added layer of safety. Can I store lithium batteries in cold temperatures during winter?
