Can the battery of the inverter be replaced separately

Overview

Do inverters need batteries?

For most residential and small commercial setups, the traditional battery and power inverter combo is the preferred choice to ensure continuous power supply during blackouts. So, while some inverter types do not require batteries, if your priority is uninterrupted backup power, investing in a quality battery in inverter system is essential.

How long do Inverter Batteries last?

Battery backup duration varies based on battery capacity, load, and battery health. A typical 150Ah tubular inverter battery running a moderate load of lights and fans can last between 4 to 6 hours. Heavy appliances or higher load will reduce this time.
