# Canada Toronto Energy Storage Project Subsidy Time

## Overview

---

What is the fastest growing energy storage technology in Canada?

BESS is the fastest growing energy storage technology in Canada and is also the dominant storage technology in terms of capacity and number of sites. All but four projects proposed to be commissioned by 2030 are battery storage, with two CAES and two PHS projects also proposed.

What's in Canada's 2023-24 budget?

This blog post explores the Canadian federal government's 2023-24 budget, highlighting key tax credits and incentives relevant to electrification, clean technology manufacturing, and energy storage projects.

When did energy storage start in Canada?

The first energy storage project in Canada, the Sir Adam Beck Pump Generating Station, came online in 1957. However, the next project did not come online until 2013. There are three main types of energy storage currently commercially available in Canada:.

What tax credits & incentives are proposed in Canada's 2023-2024 budget?

Tax credits and incentives proposed in Canada's 2023-2024 budget relevant to electrification, clean technology manufacturing, and energy storage projects.
