# Canberra Lithium Power Storage

## Overview

---

The large-scale battery energy storage system (BESS) will provide at least 250 megawatts (MW) of power. This is enough energy to power one-third of Canberra for two hours during peak demand periods. How much power will the Big Canberra battery deliver?

The Big Canberra Battery will be capable of delivering 250 MW of power – more than a third of Canberra’s peak electricity demand. It will be able to deliver this power for two hours. The Big Canberra Battery will have 500 MWh of capacity, which on a single charge could supply 23,400 households with their daily energy use.

What is the Big Canberra battery project?

The Big Canberra Battery project will provide renewable energy security across the electricity grid. It will help grow the ACT’s renewable energy sector, provide more local employment opportunities, and deliver a positive financial return for the territory. Building a cleaner future.

Will big battery power a third of Canberra households in 2025?

Canberra Times: ground breaking ceremony, plugging in profits from a big battery. ITP Renewables was engaged by ECU Energy to provide expert planning support throughout the development and delivery phases of the 250 MW Big Canberra Battery system, which will begin powering one-third of Canberra households from 2025.

How many small scale batteries will be delivered to Canberra?

Additional to the delivery of the BESS facility, 14 smaller scale batteries will be delivered to service government sites across Canberra, as well as medium-sized neighbourhood batteries to support battery storage on the distribution network.

## Canberra Lithium Power Storage
